HYGIENE IN EARLY CHILDHOOD

In early childhood, hygiene means keeping babies clean and healthy through simple routines like handwashing, wiping faces, and cleaning toys. For infants, it's not about doing it themselves, it's about gentle, caring support from adults they trust.

What We Do	Why It's Important
✋ Clean Hands	Keeps away dirt and germs
🧻 Clean every day	Helps us stay safe and healthy
🔁 Do it again and again	Makes it easier to learn and remember

Activity Name: Tiny hands, Gentle wash

Goals:

To help babies get used to being clean by playing with bubbles and gently wiping their hands, making hygiene a fun and comforting routine.

Resources:

- **Baby-safe soap**
- **warm water**
- **soft clothes**

Overview:

Infants explore soft soap bubbles in a shallow tray while an educator wipes their hands with a warm cloth, saying simple words like "all clean." This makes hygiene a playful and comforting routine.

This activity supports EYLF Outcome 3.2 – Children take increasing responsibility for their own health and physical wellbeing (Department of Education, 2022).

SAFETY IN EARLY CHILDHOOD- TOODLERS(2-3 YEARS)

Safety in early childhood means creating spaces where children can explore, learn, and play without unnecessary risk. For toddlers, this includes age-appropriate equipment, soft play areas, and active supervision by caring adults.

What We Do	Why It's Important
🧗 Use safe equipment	Prevents falls and injuries
👀 Watch closely	Helps children feel secure
🪧 Set clear rules	Teaches safe play habits early

Activity Name: Climb Safe, Play Safe

Goals:

To Help toddlers develop physical confidence while learning safe ways to move, climb, and explore.

Resources:

- **Foam climbing blocks**
- **soft mats**
- **low climbing frame**
- **visual safety signs**
- **attentive adult supervision**

Overview:

Toddlers are guided through a soft obstacle course with foam blocks and low climbing frames. Educators stay close, offering simple reminders such as "one step at a time" and "hold on here." This experience builds awareness of safe movement and trust in the environment.

This activity supports EYLF Outcome 3.2 – Children become strong in their physical wellbeing and learn to manage risks in their environment (Department of Education, 2022).

NUTRITION IN EARLY CHILDHOOD-PRESCHOOLERS (3-5 YEARS)

Nutrition in early childhood means providing children with balanced meals that fuel growth, support learning, and promote good health. At the preschool stage, children can begin to explore food choices and learn about variety.

What We Do	Why It's Important
🍎 Eat colorful foods	Gives different vitamins
🥗 Try new things	Helps us enjoy healthy meals
🗣️ Talk about food groups	Teaches good eating habits

Activity Name: Rainbow Plate Adventure

Goals:

Encourage preschoolers to eat a variety of fruits and vegetables while learning about the benefits of each.

Resources:

- **Color-coded plates**
- **fresh fruit and vegetables**
- **child-safe knives**
- **food chart**
- **attentive adult supervision**

Overview:

Children are given divided plates marked with color sections. They select fruits or vegetables to match each color, creating their own "rainbow plate." Educators explain how each color helps the body, for example, "Orange foods help keep your eyes healthy.

This activity supports EYLF Outcome 3.2, helping children develop healthy and safe lifestyle habits from an early age (Department of Education, 2022).

PHYSICAL WELLBEING FOR EARLY PRIMARY (6-8 YEARS)

Physical wellbeing means keeping the body active, strong, and flexible. For early primary students, fun movement activities encourage fitness, coordination, and healthy habits.

What We Do	Why It's Important
🤸 Move every day	Keeps the body fit and strong
🧍 Balance and stretch	Improves coordination
🏃 Play active games	Builds teamwork and energy

Activity Name: Body Moves Map

Goals:

Promote daily physical activity through fun movement challenges that support body awareness and fitness.

Resources:

- **Printed movement maps**
- **cones or markers**
- **open play space**
- **fact cards**

Overview:

Students follow a "movement map" with stations for jumping, stretching, balancing, and running. At each station, they read or hear a fact about why the movement helps their body (e.g., "Stretching keeps muscles flexible").

This activity aligns with the Australian Curriculum – Health and Physical Education: Movement and Physical Activity strand, encouraging children to be active, build skills, and enjoy movement (Australian Curriculum, Assessment and Reporting Authority, 2025).
